Data sheet

UpYouGo 1m

Auto-blocking rescue winch with 4x reduction factor, or 5x when used upside down. Ideal for use in rescue maneuvers. Developed to allow the lifting and the lowering of an injured operator or to tension a system.

- Extremely compact system functioning even when the distance from the anchor is very short;
- once the load has been raised, it stops it from slipping back down, making the action quick and easy to perform;
- the system consists of the pulleys UP ROLL and UPLOCK, with sheaves mounted on ball bearings; equipped with a flexible rope which prevents the rope from twisting;
- possibility of a lock that thanks to the self-lock system, which can be activated by using one hand, even when wearing gloves;
- equipped with two oval connector
